How can we help?

# Happy Brands

Check out  
the video!

We are a **European manufacturer** dedicated to helping brands and people worldwide communicate sustainably through **high-quality promotional products**.

We are **pioneers** in the promotion market, being **the first to prioritize** environmental sustainability. In **1992**, we created our **first pen from ecological materials**.

With over **30 years of experience** in designing and crafting authentic **eco-friendly products**, we have come a long way to offer you the finest promotional items available today.

# Why should we work together?

Caring for nature today is the foundation of our children's future

## Our products

- Made from **recycled** or **biodegradable** materials.
- Design focuses on **minimizing** weight and waste.
- We strive to use only **recycled** materials for packaging.
- We are committed to using **eco-friendly technologies** to produce our products.
- We produce **only sustainable** product from 2025!

## Our brands

- We strive to **minimize resource consumption**.
- We work with **environmentally friendly** transport companies.
- We use **only green energy**.

*our mission!*

We can bring any of your branding ideas to life!

# Certificates

We provide assurance,  
credibility, and transparency

*Ethical code  
of conduct*

We strive to achieving **100% sustainability** in our business. Connecting promotional products and brands to advance environmental and social responsibility, all while caring for people and the planet.

### **100 % ECO-friendly**

In 2025 we will stop using ABS material. All pens produced by us will be made of biodegradable or recycled materials. **ISCC Plus** – an international certification system for all sustainable raw materials. Certifies not only primary bio-based raw materials, but also recycles, i.e. recycled plastics. In this way, it confirms that the raw materials used to produce new plastics come from sustainable sources and comply with the principles of a circular economy.

*See all our  
certificates*

We are striving to be **100% eco-friendly and human-friendly**. Our notebooks will become a part of your identity and comfortable personal space, providing a smooth and soft tactile experience, designed to look and feel like they should. It is worth noting that our thinking about the sustainable use of natural resources translates into concrete action.

**FSC® the paper used to create THINKme notebooks is certified by the international**, restrictive environmental organization **FSC® (Forest Stewardship Council A.C.)**, which promotes responsible management of forest resources in the world and is represented by Representatives in over 50 countries.

The mark of  
responsible forestry

# Materials

A stylized landscape painting with rolling hills in various shades of green, yellow, and brown, under a bright yellow sky with a white sun.

By choosing sustainable materials, Brands and businesses contribute to a healthier planet by reducing waste, pollution, and resource consumption

## Biodegradable

The employed materials are the real answer to the customer demand for product with low environmental impact, even the pen colors are obtained through the use of biodegradable masterbatches. Made by nature, for nature. Bioplastic is made from materials that come from biological sources such as sugar cane, potato starch or wood cellulose, straw or corn. The Bio-Plastic employed in the production of the biodegradable pens come from renewable sources and go back to the earth through processes of the biodegradation and composing without the release of pollutants. It contains renewable raw materials such as non-genetically modified corn starch. Our pens made from corn starch (except springs and refills) are produced according to the European Union regulations: biodegradation of at least 90% of the material in less than 6 months.

 R-PET

The line of writing articles made with recycled PET coming from the collection of industrial waste and post-consumer products like water and soft drink bottles, food packaging, boxes. Once the differentiated collection is carried out and the material is transported to special sorting centres, this is shredded and regenerated in the form of flakes and granules. Thanks to its characteristics, PET can then be reused to create new products. The recycled PET thus becomes R-PET.

**GRS** 

The GRS Thinkme PU Notebook is a stylish and eco-friendly choice for those who care about sustainability. Its cover is crafted from recycled materials, specifically post-consumer polyester derived from waste plastic bottles, ensuring a positive environmental impact. For every notebook produced, the equivalent of one 0.5L plastic bottle is recycled, giving new life to waste materials.

By choosing the GRS Thinkme Notebook, you not only get a functional and elegant product but also actively contribute to reducing plastic waste. It's an ideal choice for environmentally conscious individuals or businesses seeking branded sustainable stationery solutions.

**Happy Brands** 

## Recycled

Ecoline is a line of pens produced out of recycled drink (beverage) cartons and for that reason the surface of those pens is not completely smooth. For printing on our pens we use ecological, low toxic paints compliant with EU REACH norm. Our first priority is to use recycled materials in order to protect the natural environment. Thanks to us today's waste will become a useful product – an alternative solution for schools, offices and a households. By offering this ecological product to your client you create the image of yourself as an expert in ecology which helps to establish a positive association of your brand. Due to the specific properties and fragments of recycled materials, ecological pens differ in shade and color from the standard Lecce Pen colors.

**R<sup>3</sup>ABS**

The RE-ABS pen is made from recycled plastic, thus helping to give a second life to products that would otherwise have to be disposed of with which involves additional energy consumption. The use of recycled plastics is part of a broader concept of circular economy, which represents an alternative model characterized by greater sustainability than the traditional linear economy.

- In a circular economy, resources are used as long as possible, making the most of their value during the entire life. At the end of their use they are recovered and regenerated to give them a second life.
- The linear model follows the path of production, use and disposal.

**SafeTouch™**   
antibacterial

SafeTouch Antibacterial™ an ideal solution for public places where the pen is passed on from hand to hand, and where children play. An antibacterial component added to the plastic is active through out the entire life cycle of the pen. After 24h 90% of bacteria are killed. The antibacterial effect has been confirmed and certified. The material is completely safe for the skin

# Sales Support

- Enhances Customer Experience
- Builds Trust and Credibility
- Improves Decision-Making
- Personalizes the Sales Pitch
- Supports Product Education
- Facilitates Long-Term Relationships
- Drives Differentiation
- Saves Time in Negotiations

**Our Sample kits** designed to bridge the gap between concept and reality, empowering **clients to see and feel the value of product**. They're a **powerful tool** to enhance trust, speed up decisions, and ultimately close more deals!

**EN**  
GreenLine pens are produced with a **new bioplastic of natural origin**: born from renewable resources of agricultural origin (non genetically modified **corn or potato starch**)

and return to the earth through biodegradation and/or composting processes **without releasing polluting substances** (also the dyes used are biodegradable). The pens produced with this new bioplastic (except refill and spring) are **100% biodegradable** responding to the demand for consumer products with low environmental impact.

**PL**  
Długopisy z kolekcji **green** są produkowane z nowego **bioplastiku** pochodzenia naturalnego: stworzone z odnawialnych zasobów pochodzenia rolniczego, typu **skrobia kukurydziana, ziemniaczana**.

Powracają do obiegu poprzez biodegradację i/lub proces kompostowania **bez uwalniania szkodliwych substancji**. Długopisy produkowane z użyciem nowego bioplastiku (wyłączając wkład i sprężynkę) są w **100% biodegradowalne** w odpowiedzi na popyt na produkty o niskim wpływie na środowisko.

**IT**  
Le penne **GreenLine** sono prodotte con una **nuova bioplastica** di origine naturale: nasce da risorse rinnovabili di origine agricola (**amido di mais o di patate non geneticamente modificate**)

e ritornano alla terra attraverso processi di biodegradazione e/o compostaggio **senza rilasciare sostanze inquinanti** (anche i coloranti utilizzati sono biodegradabili). Le penne prodotte con questa nuova bioplastica (tranne il refill e la molla) sono biodegradabili al **100% e rispondono alla domanda** di prodotti di consumo a basso impatto ambientale.

**FR**  
Les stylos **GreenLine** sont produits avec un **nouveau bioplastique** d'origine naturelle : né de ressources renouvelables d'origine agricole (**amidon de maïs ou de pomme de terre non génétiquement modifié**)

et retournent à la terre par des processus de biodégradation et/ou de compostage **sans libérer de substances polluantes** (les colorants utilisés sont également biodégradables). Les stylos produits avec ce nouveau bioplastique (à l'exception de la recharge et du ressort) sont **100% biodégradables**, ce qui répond à la demande de produits de consommation à faible impact sur l'environnement.

**DE**  
**GreenLine-Stifte** werden mit einem neuen **Biokunststoff natürlichen Ursprungs** hergestellt: aus erneuerbaren Ressourcen landwirtschaftlichen Ursprungs (**nicht genetisch veränderte Mais- oder Kartoffelstärke**)

durch biologischen Abbau und/oder Kompostierung in die Erde zurückkehren, **ohne dabei Schadstoffe freizusetzen** (auch die verwendeten Farbstoffe sind biologisch abbaubar). Die mit diesem neuen Biokunststoff hergestellten Stifte (außer Mine und Feder) sind zu **100% biologisch** abbaubar und entsprechen damit der Nachfrage nach Konsumgütern mit geringer Umweltbelastung.

**ES**  
Los **bolígrafos GreenLine** se producen con un nuevo bioplástico de origen natural: nace de recursos renovables de origen agrícola (**almidón de maíz o patata no modificados genéticamente**)

y vuelven a la tierra mediante procesos de biodegradación y/o compostaje sin liberar **sustancias contaminantes** (también los tintes utilizados son biodegradables). Los bolígrafos fabricados con este nuevo bioplástico (excepto el recambio y el muelle) son **100% biodegradables**, respondiendo así a la demanda de productos de consumo con bajo impacto medioambiental.

## Colors

### EN

**EcoLine** is a line of writing instruments made in a **special material** coming from the **recycling of beverage cartons**. Beverage cartons are in fact composed of several layers: cellulose, polyethylene and aluminum. After a first processing for the recovery of cellulose, the fraction of polyethylene and aluminum is further processed to generate a new second raw material. **This recycled material has a very particular aesthetic aspect** (thanks to the presence of aluminum together with the plastic component) which distinguishes it from any other on the market.

### PL

**EcoLine** - długopisy z **recyklingu kartoników** po napojach. Kartoniki te wykonane są z kilku warstw: celulozy, polietylenu i aluminium. Po pierwszym etapie odzyskiwania celulozy frakcja polietylenu i aluminium jest dalej przetwarzana w celu wytworzenia nowego surowca. **Uzyskany w ten sposób materiał posiada bardzo szczególną wartość estetyczną** (dzięki obecności aluminium połączonego z plastikiem), która wyróżnia go spośród innych obecnych na rynku materiałów.

### IT

**EcoLine** è una linea di strumenti di scrittura realizzati in uno **speciale materiale proveniente dal riciclo dei cartoni** per bevande. I cartoni per bevande sono infatti composti da diversi strati: cellulosa, polietilene e alluminio. Dopo una prima lavorazione per il recupero della cellulosa, la frazione di polietilene e alluminio viene ulteriormente lavorata per generare una nuova materia prima seconda. **Questo materiale riciclato ha un aspetto estetico molto particolare** (grazie alla presenza dell'alluminio insieme alla componente plastica) che lo distingue da qualsiasi altro sul mercato.

### FR

**EcoLine** est une ligne d'instruments d'écriture fabriqués dans un **matériau spécial issu du recyclage des briques** à boisson. Les briques de boissons sont en effet composées de boissons couchées : cellulose, polyéthylène et aluminium. Après un premier traitement pour la récupération de la cellulose, la fraction de polyéthylène et d'aluminium est transformée pour générer une nouvelle matière première. **Ce matériau recyclé a un aspect esthétique très particulier** (grâce à la présence de l'aluminium avec la composante plastique) qui le distingue de tous les autres sur le marché.

### DE

**EcoLine** - Stifte aus recycelten Getränkekartons. **Diese Kartons** bestehen aus mehreren Schichten: Zellulose, Polyethylen und Aluminium. Nach der ersten Stufe der Zellstoffrückgewinnung wird die Polyethylen- und Aluminiumfraktion weiterverarbeitet, um ein neues Rohmaterial herzustellen. **Das daraus resultierende Material hat einen ganz besonderen ästhetischen Wert** (dank des Aluminiums in Kombination mit Kunststoff), der es von anderen Materialien auf dem Markt unterscheidet.

### ES

**EcoLine** es una línea de instrumentos de escritura fabricados con un **material especial procedente del reciclado de cartones de bebidas**. De hecho, los cartones de bebidas se componen de varias capas: celulosa, polietileno y aluminio. Tras un primer tratamiento para la recuperación de la celulosa, la fracción de polietileno y aluminio se sigue procesando para generar una nueva segunda materia prima. **Este material reciclado tiene un aspecto estético muy particular** (gracias a la presencia de aluminio junto con el componente plástico) que lo distingue de cualquier otro del mercado.

EN

**Antibacterial eco-friendly** pens made of recycled beverage cartons. Result of combining traditional plastics with an antibacterial addition **BIOMASTER** inhibiting the growth and spread of microorganisms. The product prototypes have positively undergone microbiological tests accordance with the standard - **ISO 22196:2011**. With the new technology, end products will have exceptionally strong biostatic properties that will reduce 99% of bacteria and positively impact safety, health, hygiene and, consequently, the quality of life.

PL

**EcoLine** jest kolekcją długopisów wykonaną ze specjalnego materiału pochodzącego z recyklingu kartoników po napojach. Używany w naszych produktach dodatek antybakteryjny **BIOMASTER** pochodzenia nieorganicznego o działaniu antybakteryjnym i antygrzybicznym stworzono w Unii Europejskiej zgodnie z unijnymi normami i wymogami. Efekt biostatyczny został potwierdzony badaniami laboratoryjnymi przeprowadzonymi zgodnie z normą - **ISO 22196:2011**.

IT

Penne **ecologiche antibatteriche** realizzate con cartoni per bevande riciclati. Risultato della combinazione di plastiche tradizionali con un additivo antibatterico **BIOMASTER** che inibisce la crescita e la diffusione dei microrganismi. I prototipi del prodotto sono stati sottoposti a test microbiologici secondo lo standard **ISO 22196:2011**. Grazie alla nuova tecnologia, i prodotti finali avranno proprietà biostatiche eccezionalmente forti che ridurranno il 99% dei batteri e avranno un impatto positivo sulla sicurezza, sulla salute, sull'igiene e, di conseguenza, sulla qualità della vita.

FR

Stylos **écologiques antibactériens** fabriqués à partir de briques à boisson recyclées. Résultat de la combinaison de plastiques traditionnels avec un ajout additif antibactérien **BIOMASTER** inhibant la croissance et la propagation des micro-organismes. Les prototypes du produit ont été soumis à des tests microbiologiques conformes à la norme **ISO 22196 : 2011**. Grâce à cette nouvelle technologie, les produits finis auront des propriétés biostatiques exceptionnellement fortes qui réduiront 99 % des bactéries et auront un impact positif sur la sécurité, la santé, l'hygiène et, par conséquent, la qualité de vie.

DE

**EcoLine** ist eine Kollektion von **Kugelschreibern** aus einem speziellen Material, das aus recycelten Getränkekartons hergestellt wird. Der anorganische antibakterielle und antimykotische Zusatzstoff **BIOMASTER**, der in unseren Produkten verwendet wird, wurde in der Europäischen Union in Übereinstimmung mit den EU-Normen und -Anforderungen entwickelt. Die biostatistische Wirkung wurde durch Labortests bestätigt, die gemäß der Norm **ISO 22196:2011** durchgeführt wurden.

ES

Bolígrafos **ecológicos antibacterianos** fabricados con cartones de bebidas reciclados. Resultado de la combinación de plásticos tradicionales con un additivo antibacteriano **BIOMASTER** que inhibe el crecimiento y la propagación de microorganismos. Los prototipos del producto se han sometido positivamente a pruebas microbiológicas de acuerdo con la norma - **ISO 22196:2011**. Con la nueva tecnología, los productos finales tendrán propiedades bioestáticas excepcionalmente fuertes que reducirán el 99% de las bacterias y tendrán un impacto positivo en la seguridad, la salud, la higiene y, en consecuencia, la calidad de vida.

EN

**EcoLine** is a line of writing instruments made in a special material coming from the recycling of beverage cartons. Beverage cartons are in fact composed of several layers: cellulose, polyethylene and aluminum. After a first processing for the recovery of cellulose, the fraction of polyethylene and aluminum is further processed to generate a new second raw material. This recycled material has a very particular aesthetic aspect (thanks to the presence of aluminum together with the plastic component) which distinguishes it from any other on the market.

PL

**EcoLine** jest kolekcją długopisów wykonaną ze specjalnego materiału pochodzącego z recyklingu kartoników po napojach. Kartoniki te wykonane są z kilku warstw: celulozy, polietylenu i aluminium. Po pierwszym etapie odzyskiwania celulozy frakcja polietylenu i aluminium jest dalej przetwarzana w celu wytworzenia nowego surowca. Uzyskany w ten sposób materiał posiada bardzo szczególną wartość estetyczną (dzięki obecności aluminium połączonego z plastikiem), która wyróżnia go spośród innych obecnych na rynku materiałów.

IT

**EcoLine** è una linea di strumenti di scrittura realizzati in uno speciale materiale proveniente dal riciclo dei cartoni per bevande. I cartoni per bevande sono infatti composti da diversi strati: cellulosa, polietilene e alluminio. Dopo una prima lavorazione per il recupero della cellulosa, la frazione di polietilene e alluminio viene ulteriormente lavorata per generare una nuova materia prima seconda. Questo materiale riciclato ha un aspetto estetico molto particolare (grazie alla presenza dell'alluminio insieme alla componente plastica) che lo distingue da qualsiasi altro sul mercato.

FR

**EcoLine** est une ligne d'instruments d'écriture fabriqués dans un matériau spécial issu du recyclage des briques à boisson. Les briques des boissons sont en effet composées de plusieurs couches : cellulose, polyéthylène et aluminium. Après un premier traitement pour la récupération de la cellulose, la fraction de polyéthylène et d'aluminium est transformée pour générer une nouvelle matière première. Ce matériau recyclé a un aspect esthétique très particulier (grâce à la présence de l'aluminium avec la composante plastique) qui le distingue de tous les autres sur le marché.

DE

**EcoLine** ist eine Kollektion von Kugelschreibern aus einem speziellen Material, das aus recycelten Getränkekartons hergestellt wird. Diese Kartons bestehen aus mehreren Schichten: Zellulose, Polyethylen und Aluminium. Nach der ersten Stufe der Zellulosewiedergewinnung wird die Polyethylen- und Aluminiumfraktion weiterverarbeitet, um ein neues Rohmaterial herzustellen. Das daraus resultierende Material hat einen ganz besonderen ästhetischen Wert (dank des Aluminiums in Kombination mit Kunststoff), der es von anderen Materialien auf dem Markt unterscheidet.

ES

**EcoLine** es una línea de instrumentos de escritura fabricados con un material especial procedente del reciclado de cartones de bebidas. De hecho, los cartones de bebidas se componen de varias capas: celulosa, polietileno y aluminio. Tras un primer tratamiento para la recuperación de la celulosa, la fracción de polietileno y aluminio se sigue procesando para generar una nueva segunda materia prima. Este material reciclado tiene un aspecto estético muy particular (gracias a la presencia de aluminio junto con el componente plástico) que lo distingue de cualquier otro del mercado.

**EN**  
A simple classic line and a high quality of the product ensures its constant appeal regardless of the constantly changing trends in design. Offered in soft color palette emphasizes the credibility and professionalism of the company using it to promote its own brand. **Dual-purpose, designed for traditional writing as well as for use on mobile devices.**

**PL**  
Prosta klasyczna linia oraz wysoka jakość produktu zapewnia jego stałą atrakcyjność niezależnie od stale zmieniających się trendów w designie. Oferowany w stonowanej paletce kolorystycznej podkreśla wiarygodność oraz profesjonalizm firmy wykorzystującej go do promocji własnej marki. **Dwufunkcyjny, przeznaczony do tradycyjnego pisania i użytkowania na urządzeniach mobilnych.**

**IT**  
Una linea semplice e classica e l'alta qualità del prodotto ne garantiscono il costante appeal, indipendentemente dalle tendenze in continua evoluzione del design. L'offerta di una palette di colori tenui sottolinea la credibilità e la professionalità dell'azienda che la utilizza per promuovere il proprio marchio. **Doppio uso, progettato per la scrittura tradizionale e per l'uso su dispositivi mobili.**

**FR**  
Une ligne simple et classique et la haute qualité du produit garantissent son attrait constant, indépendamment des tendances en constante évolution en matière de design. La palette de couleurs douces souligne la crédibilité et le professionnalisme de l'entreprise qui l'utilise pour promouvoir sa propre marque. **Double usage, conçu pour l'écriture traditionnelle et pour une utilisation sur des appareils mobiles.**

**DE**  
Die schlichten, klassischen Linien und die hohe Qualität des Produkts sorgen dafür, dass es unabhängig von den sich ständig ändernden Designtrends weiterhin attraktiv bleibt. Mit seiner dezenten Farbpalette unterstreicht es die Glaubwürdigkeit und Professionalität des Unternehmens, das es zur Förderung seiner Marke einsetzt. **Doppelt verwendbar, sowohl für traditionelles Schreiben als auch für die Nutzung auf mobilen Geräten.**

**ES**  
Una línea clásica sencilla y la alta calidad del producto garantizan su atractivo constante, independientemente de los cambios constantes en las tendencias de diseño. Ofrecido en una paleta de colores suaves, subraya la credibilidad y profesionalidad de la empresa que lo utiliza para promocionar su propia marca. **Doble propósito, diseñado tanto para la escritura tradicional como para su uso en dispositivos móviles.**

**EN**

Two-colored cover stylishly stitched along the spine, with smart features like a pocket and an elastic band, makes it a practical gadget. Contrasting colors attract attention, while the simplicity emphasizes its casual style. The GRS notebook cover is made from recycled materials, including polyester derived from used plastic bottles.

**PL**

Dwukolorowa okładka, stylowo przesyta wzdłuż grzbietu, z praktycznymi elementami, takimi jak kieszeń i elastyczna opaska, czyni z niej praktyczny gadżet. Kontrastujące kolory przyciągają uwagę, a prostota podkreśla swobodny styl. Okładka notesu GRS jest wykonana z materiałów pochodzących z recyklingu, w tym poliestru z przetworzonych butelek plastikowych.

**IT**

Copertina bicolore, elegantemente cucita lungo il dorso, con funzionalità pratiche come una tasca e una fascia elastica, la rende un gadget utile. I colori contrastanti attirano l'attenzione, mentre la semplicità enfatizza lo stile casual. La copertina del quaderno GRS è realizzata con materiali riciclati, inclusi poliestere derivato da bottiglie di plastica usate.

**FR**

Couverture bicolore, élégamment cousue le long du dos, avec des fonctionnalités pratiques comme une poche et un élastique, en fait un gadget pratique. Les couleurs contrastées attirent l'attention, tandis que la simplicité souligne son style décontracté. La couverture du carnet GRS est fabriquée à partir de matériaux recyclés, y compris du polyester issu de bouteilles en plastique usagées.

**DE**

Zweifarbige Hülle, stilvoll entlang des Buchrückens vernäht, mit praktischen Funktionen wie einer Tasche und einem Gummiband, macht sie zu einem nützlichen Gadget. Kontrastierende Farben ziehen die Aufmerksamkeit auf sich, während die Schlichtheit den lässigen Stil betont. Die GRS-Notizbuchhülle besteht aus recycelten Materialien, einschließlich Polyester aus gebrauchten Plastikflaschen.

**ES**

Cubierta bicolor, elegantemente cosida a lo largo del lomo, con características prácticas como un bolsillo y una banda elástica, lo convierte en un accesorio útil. Los colores contrastantes atraen la atención, mientras que la simplicidad enfatiza su estilo casual. La cubierta del cuaderno GRS está hecha de materiales reciclados, incluido poliéster derivado de botellas de plástico usadas.
